Notes

1. Soft Bullet Date (Extended Maturity)

If the covered bonds are not redeemed on the relevant maturity date, the maturity will automatically be extended on a monthly basis up to one year. In that event, the covered bonds can be redeemed in whole or in part on a monthly basis up to and including the Extended Maturity Date.

2. Other Assets

In addition to the mortgage assets, other assets (or substitution assets) may be included in the cover pool up to an amount equal to 20% of the cover pool, subject to the following eligibility criteria:

- Deposit with the Bank of Portugal in cash or ECB eligible securities or
- Deposits held with credit institutions rated at least A-.

3. Overcollateralisation

The overcollateralisation ratios are calculated by dividing (i) the total nominal outstanding balance of the assets included in the cover pool by (ii) the total nominal amount of the covered bonds (both excluding accrued interest). For clarification purposes, all assets included in the covered pool are eligible assets.

Required overcollateralisation is the minimum overcollateralisation necessary to keep the current Mortgage Covered Bond Programme rating.

4. Net Present Value (NPV)

The NPV of Assets and Liabilities is obtained by discounting all known future cash flows with:

- the Euro money market curve, for cash flows up to 1 year;
- the Euro swap curve, for cash flows after 1 year.

Other Assets and derivatives are considered at market value.

NPV is also calculated considering a 200 bps shift (upwards and downwards) of the discounting curves.

5. Loan-to-Value

The Current Unindexed LIV is calculated by dividing the outstanding balance of the loan by the value of the underlying property (last physical valuation).

A full valuation of the underlying properties must be performed by an independent appraiser, at origination or after, prior to the inclusion of the mortgage loan in the cover pool.

Properties should also be revalued regularly:

- The value of residential properties should be checked on a frequent basis, at least every three years, in order to identify those that require appraisal by an expert (this procedure can be done using statistical models approved by the Bank of Portugal); if the individual mortgage credit value exceeds EUR 500,000, the property must be revalued by an expert at least every 3 years;
- The value of commercial properties must be verified on an annual basis (this procedure can be done using statistical models approved by the Bank of Portugal); if the individual commercial credit exceeds EUR 1,000,000.00, the property must be revalued by an expert at least every 3 years.

6. Insured Property

All mortgages must have property damage insurance covering fire and floods.

7. Delinquencies

A loan is considered to be delinquent if any payment is in arrears by more than 30 days. According to the Portuguese covered bonds legislation, any loan which is in arrears by more than 90 days must be removed from the pool and substituted by another loan which fulfils the eligibility criteria. Therefore, there are no NPL's included in the cover pool.
